

Information about COVID-19

A note to patients of the Skandion Clinic

Do not come to the clinic if you have the slightest new symptom of a cold or flu: cough, fever, headache, sore throat, muscle and joint pain, diarrhea.
Call our reception: +4618-495 80 00.

It is critical that patients having proton therapy protect themselves from the risk of infection. It is important that you follow the guidelines of the Public Health Agency of Sweden

To avoid being infected, it is important to keep the following in mind in the coming weeks:

- Limit your contact with others. Avoid crowds that may occur in, for example, public transport, shops, gyms or other public facilities. Do your shopping and run errands when there are as few people as possible around or – better still – ask someone to help you with this.
- Even friends may infect you, make sure you meet as few people as possible. However, you do not need to isolate yourself completely. You may take a walk outside with others but keep a distance of two meters.
- At the Skandion Clinic, we want to limit the number of people in our entrance hall. Therefore, we want only one relative/companion to accompany the patient.
- If you stay at the Hotel von Kraemer, it is possible for you to stay over the weekends. If you want to do that, ask your doctor about the rules that apply at your home clinic.

Be safe and should you have any questions, please do not hesitate to ask at the reception. If you want to call us, our phone number is +4618-495 80 00.
